Full Stack Developer with 4+ years of experience building scalable web applications using Angular, React, Node.js, MongoDB, and MySQL. Experienced in developing responsive interfaces, REST APIs, and real-time features. Proven ability to deliver high-quality, maintainable solutions and optimize performance in fast-paced product development environments.

WORK EXPERIENCE

Softobiz Technology

Project Lead / Full-Stack Developer *02/2022 - Present*

- Developed core modules for Shipper, Carrier, Driver, and Solo Driver using Angular and Node.js, enabling efficient logistics workflows within the Shipping Marketplace Platform (SMP). Implemented a real-time live map to track shipments and driver locations, improving operational visibility. Designed the shipment lifecycle with statuses such as Open, Active, and Completed to streamline operations. Integrated real-time chat using Socket.io for instant communication and collaborated with cross-functional teams to enhance system performance through strong frontend and backend integration.

- Developed a Franchise Module to manage franchise locations and client-specific staff details. Enabled document upload and management for each location, streamlining operational workflows. Built the module using Angular, ensuring a dynamic, interactive, and user-friendly interface. Enhanced operational efficiency by providing a scalable solution for managing franchise data and associated resources. (Firstpath

- Developed a dynamic Gift Finder feature to enhance the shopping experience with personalized product recommendations. Utilized JavaScript, BigCommerce APIs, and Contentful CMS to manage product data, images, and content. Designed and implemented NestJS APIs for efficient product data uploads and management within Contentful. Ensured seamless integration between the Gift Finder and the product catalog, boosting user engagement and driving e-commerce conversions. (Oroton

PERSONAL PROJECT

- E-Commerce

  I developed an E-commerce website using React.js, featuring product listings, search, cart, and secure checkout. The site is fully responsive and optimized for performance with React Hooks and Context API. Technologies used include React.js, JavaScript, HTML, CSS, and REST API for dynamic product and order management.

- Realtime Comment System application

  I developed a Realtime Comment System using JavaScript, Node.js, Express.js, MongoDB, and Socket.io. It allows users to post, update, and view comments instantly without reloading. With database integration and live updates, the system ensures fast performance, scalability, and an interactive user experience for collaborative platforms.

- Blog Website

  I created a Blog Website using Node.js, Express.js, and MongoDB. It enables users to create, edit, and delete blog posts with a secure backend and dynamic content storage. The application provides scalability, smooth CRUD operations, and an intuitive interface for managing and sharing blogs effectively

EDUCATION

B.Tech (IT) Hindustan college of science and technology

07/2016 - 09/2020

SKILLS

Angular | Node.js | React JS | JavaScript | MySQL Database | MongoDB | Express.js | TypeScript | GitHub Actions | Nest JS | HTML/CSS | Firebase | Rest APIs | Communication Skills

CERTIFIC ATES/AWARDS

- 2024 Received laser focus award at Softobiz

2021-12Recipient of Javascript and React course

CompTIA Security+ (Udemy) (11/2020)

2018 Got Awarded as the Associate Manager in the

College Annual Fest - Gyan Jyoti

- ***Top Performer***

Awarded Top Performer by the organization for exceptional contributions to the SMP project, delivering critical backend modules and ensuring project success.

- ***Above & Beyond***

Recognized with the Above & Beyond award for exceptional dedication and teamwork on the Oroton project, earning client appreciation for delivering high-quality results.
